

## TSIII HA Fixture Line Up

M Connection      R Connection

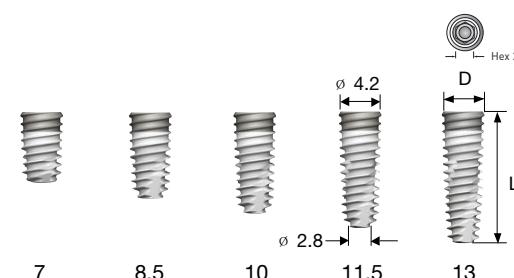

\* Actual size may be different.

### Mini      Diameter ø 3.5

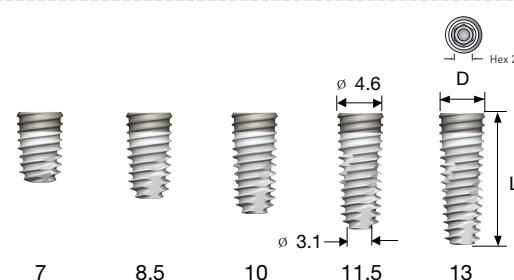

| Connection | Mini |           |
|------------|------|-----------|
| L          | D    | ø 3.5     |
| 7          |      | -         |
| 8.5        |      | TS3M3508H |
| 10         |      | TS3M3510H |
| 11.5       |      | TS3M3511H |
| 13         |      | TS3M3513H |

### Regular      Diameter ø 4.0

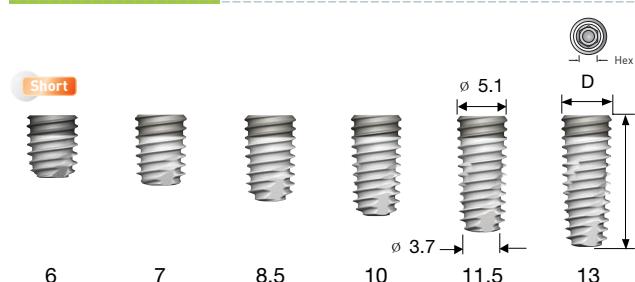

| Connection | Regular |           |
|------------|---------|-----------|
| L          | D       | ø 4.0     |
| 7          |         | TS3S4007H |
| 8.5        |         | TS3S4008H |
| 10         |         | TS3S4010H |
| 11.5       |         | TS3S4011H |
| 13         |         | TS3S4013H |

### Regular      Diameter ø 4.5

| Connection | Regular |           |
|------------|---------|-----------|
| L          | D       | ø 4.5     |
| 7          |         | TS3S4507H |
| 8.5        |         | TS3S4508H |
| 10         |         | TS3S4510H |
| 11.5       |         | TS3S4511H |
| 13         |         | TS3S4513H |

### Regular      Diameter ø 5.0

| Connection | Regular |           |
|------------|---------|-----------|
| L          | D       | ø 5.0     |
| 6          |         | TS3S5006H |
| 7          |         | TS3S5007H |
| 8.5        |         | TS3S5008H |
| 10         |         | TS3S5010H |
| 11.5       |         | TS3S5011H |
| 13         |         | TS3S5013H |

NoMount Fixture Product Code (ex:TS3S4011H)

Pre-mounted Fixture (Simple Mount) Fixture + Mount + Cover Screw : B + Product Code (ex:BTS3S4011H)

# OSSTEM HA surface

# OSSTEM HA surface

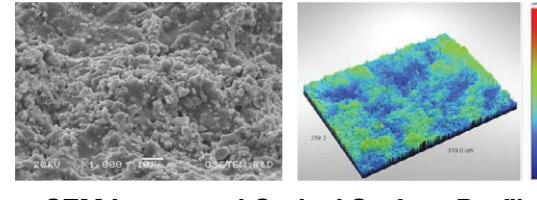

## OSSTEM HA Surface

### OSSTEM<sup>®</sup> HA Surface IMPLANT

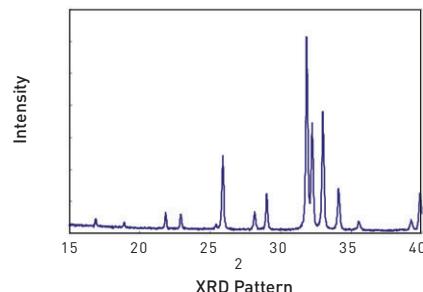

**HA :** HydroxyApatite coated surface

- Optimal morphology : combination of crater and micro-pit
- Optimal surface roughness : Ra 2.8~3.1  $\mu$ m
- Early cell response and bone healing : 40% higher than RBM
- Early bone healing : 40% higher than RBM
- Early loading possible after 4 weeks of implantation

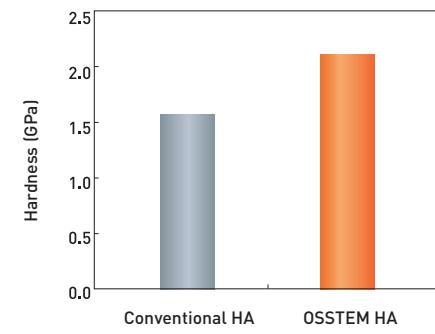

SEM Image and Optical Surface Profile

## Surface Layer Properties

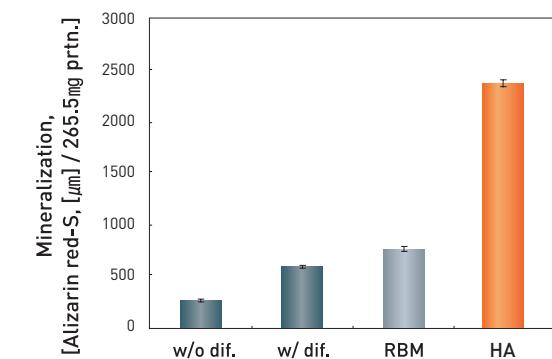

Above 98% crystallization degree at HA coated layer

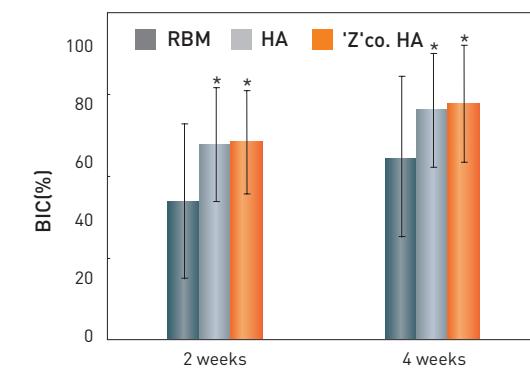

30% hardness improvement with HA coating

## Early Cell Response

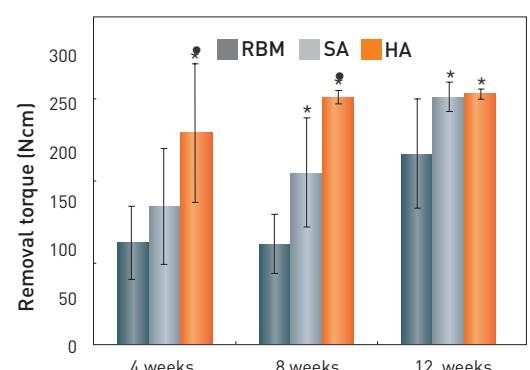

Mineralization on the HA

## Pre-clinical Study

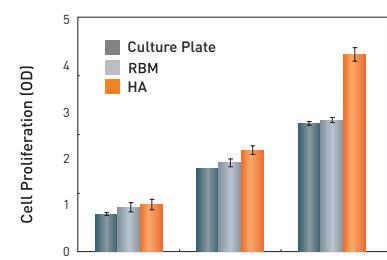

\*p < 0.05, RBM vs. OSSTEM HA or 'Z' Co.HA

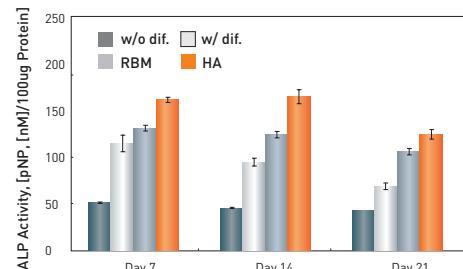

\*p < 0.05, RBM vs. SA or HA; •p < 0.05, SA vs. HA

## Early Cell Response

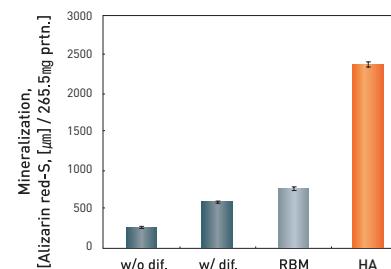

\* Improvement of ALP Activity by 24 and Alizarin Red-S assay(Mineralization) by 210% compared to RBM surface

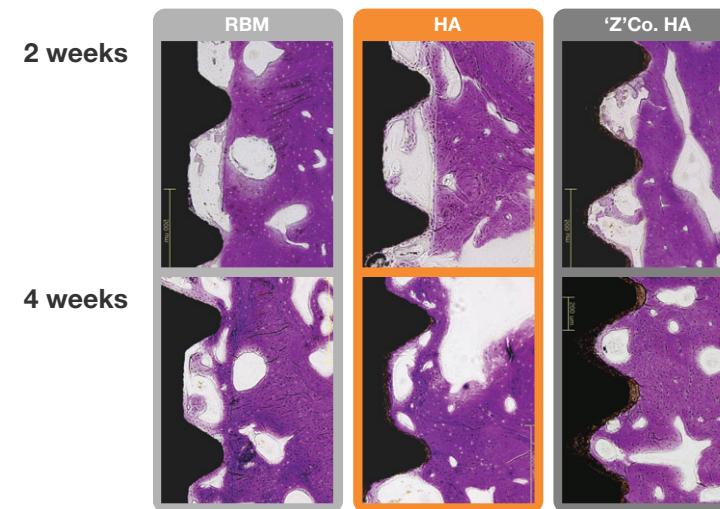

Cell proliferation on the HA

ALP activity on the HA

Mineralization on the HA

40% improvement on bone regeneration on micro pig compared to RBM and similar or equivalent to competing 'Z' company's HA surface implants.

BIC(Bone-to-Implant contact), 12 micro pigs, mandible, n=8
